1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-34 is that none of the references cited, taken either singly or in combination, teach or disclose a method of removing filter cake containing a bridging agent soluble in a carboxylic acid salt from a producing zone penetrated by a well bore, which may be carried out in conjunction with gravel packing of the well bore, as in the claimed combinations, including steps (b) of claim 1, and steps (d) of claims 14 and 28. For example, it noted that reference to Harris et al (6,702,023; 6,763,888), disclose the use of a carboxylic acid ester which hydrolyzes to form a carboxylic acid to remove a filter cake from the wellbore, however Harris et al '888 does not explicitly call for the presence of a bridging agent in the filter cake or call for the use of a catalyst; while Harris et al '023 does not use a base and/or urea to catalyze the hydrolysis of the carboxylic acid ester or provide a bridging agent in the filter cake.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 571-272-7036. The examiner can normally be reached on M-F (6:30 - 3:00).
